

Extremely simple, portable

Tap water with chlorine is affecting our health, however old-fashioned water filtration system cannot accompany with us when working and traveling. pure water always accompanies me, even in the company or travel. Where can we find filtration system with durable and portable?

Product Certification

Gold Seal Certificate

Comefresh Electronic Industry Co.,Ltd

NO.35 Xiangyue Road, Torch Hi-tech Industrial Zone, Xiangan
Xiamen, Fujian China

Facility: Comefresh Electronic Industry Co.,Ltd

Certification Date: May 30, 2017

Authorized By: Tom Spoden

Multi-functional, broadly applicable

Portable Water Filter CF-7000

Daily drinking

Place the water filter cup on the cup to remove impurities, is healthier when filtered out Impurity

Traveling

easily to tear down and carry

Washing for face

Tap water is safer and cleaner after filtration

Washing for vegetable

4 stage filtration, cleaner and safer

Flow speed, save time

Flow rate 1.3L/per minute

“Straight out from the tap. Drink directly”

The difference between superior functions of ACF (Activated Carbon Fiber) and general activated carbon on the market.

- 8 times longevity, better than others in the market.
- Water filtration of the product is greater than general products on the market more than 2 times, no need to wait for good water!
- The replacement is simple! Disposable filter can be avoiding the danger of releasing pollutants when the filter is no longer useful.
- Longer product lifespan; A better product which saves your cost!

Material with high quality

Portable Water Filter CF-7000

100% BPA-free

clear as crystal

stronger

Hydrolysis
resistance

High quality filter for getting pure water 4 stage filtration

The filter as the key to good water

— ACF (Activated Carbon Fibers).

Generally, tap water with chlorine is an oxidant which will produce carcinogens or affect your health in long-term. Using ACF to ensure healthy drinking water for daily life.

Innovation technology of filtration

A technology of filtration by Japan - Activated Carbon Fiber (ACF)

We upgrade and increase the efficacy of activated carbon such as No black specks, no carbs water. New ACF, without these defect, healthier and safer.

Specification

Model No. : CF-7000

Product: Portable Water Filter cup

Dimension: 124x124x115mm

Product includes: water filter cup X 1, filter X 1

Temperature for use and storage: 5-40°C

Inlet water: tap water Average flow rate: 1L/min

Filter life-span: 568L

Color:
