Puretron®

H2-SP01W

Sport Style

Portable Style, Hydrogen and Oxygen Separation Type

Safe Materials

Sealed and Leakproof

High Concentration
of H2

Easy to Carry

Drinking Water should choose hydrogen water

Importance of good "water"

Free radicals-the source of illness

Human body is composed of cells, all human diseases can all be attributed to cell damage and senescence can also be attributed to ageing or death of cells. Cells become sick and get old because of free radicals.

Hydrogen can remove free radicals

Hydrogen molecules combine with reactive oxygen, become water and finally excreted from the body.

What is Suisosui(Hydrogen Water)?

Suisosui(Hydrogen water),
the word origins from Japan, meaning hydrogen, also called Hydrogen water.

Why Suisosui(Hydrogen water) can improve health of human body?

It is well known that human body is composed of cells, all human diseases can all be attributed to cell damage and senescence can also be attributed to ageing or death of cells. Cells become sick and get old because of overwhelming free radicals.

"H2 Hydrogen" benefits to human body a lot. It can adjust the physical fitness, help you sleep and maintain health...etc.

Theory: Hydrogen molecules combine with reactive oxygen, become water and finally excreted from the body.

The Body of the Cup is Made of Tritan™

Tritan™ is No BPA (Bisphenol A) Components in the Polymerization Process
It Will Not Release of Bisphenol A During the Process of Using.
It Is Your Safest Choice!

One Click to Open

Open the Cover by One Hand And Easy to Drink the Water
Do Not Rebound

USB Charging Port

Hidden Design · Sealed for Waterproof

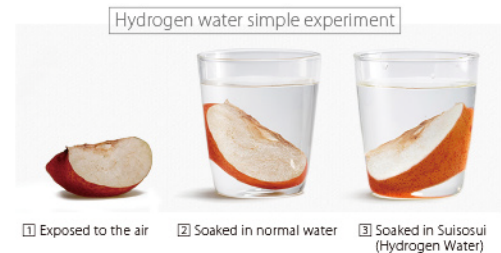

Titanium Platinum Electrolysis Technology

Hydrogen and Oxygen Separation, Efficient Hydrogen Production,
Healthy and Environmental Protection

Using Japanese Batteries, Stable Quality, And High Durability.

Drink hydrogen water and make yourself healthy and beautiful.

Hydrogen water

① Exposed to the air ② Soaked in normal water ③ Soaked in Suisosui (Hydrogen Water)

The experiment proves that such rich-hydrogen water like Suisosui can delay oxidation in a certain degree.

Model	H2-SP01W
Capacity	360ml
Dimension	Outside Diameter 70±1mm x Height 195mm
Charging Time	Charge About 2~3 Hours to Complete
Power Consumption	5W
Voltage	5V
Work Times	3 min/18-20 times, 5 min/12-15 times
Battery Life	It Can Produce Hydrogen about 5000 Times
Weight	It Can Charge 300 Times
	253 Gram
