High-Purity Hydrogen Inhaler
for Clarity, Energy & Recovery.

H2-HA100

✦ **Try a daily breath of hydrogen.**

Small molecule. Big impact.

up to **99.995%** Concentration

Hydrogen Inhalation / Oxygen Inhalation / Both

🔗 Benefits for Hydrogen inhaler breathing

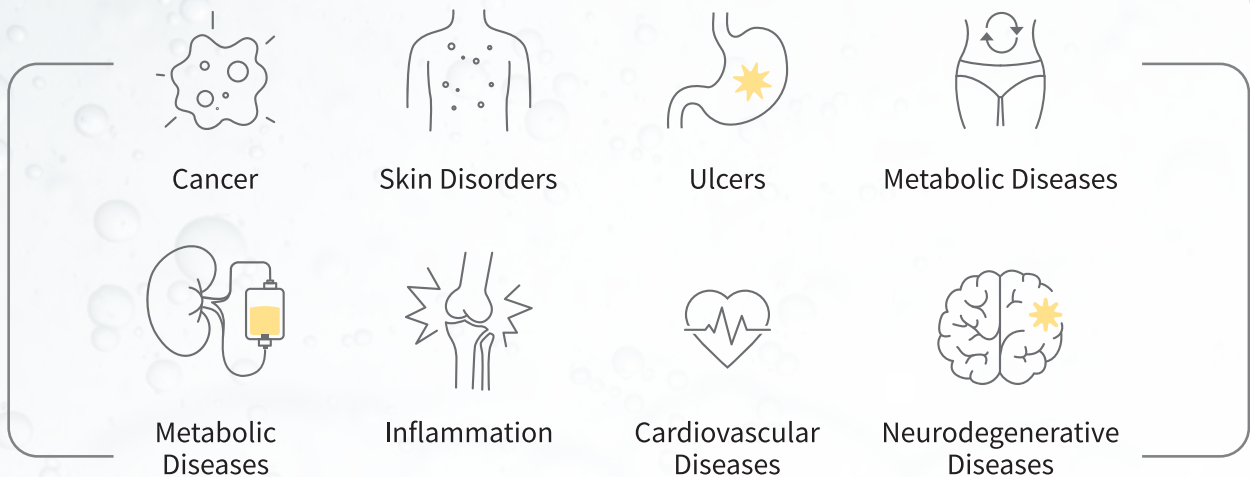

1. Increase Circulation & Repair Capillaries
2. Improve sleep quality, deeper more restful sleep
3. Converts Free Radicals to Water for Hydration
4. Protects Against Neurodegenerative Changes
5. Prevent & Reverse Degenerative Diseases

Tiny hydrogen molecules with
Strong Reducing Power that can
 selectively neutralize free radicals
 & bring **New Strength** to the human body.

Hydrogen Treatment

✦ **Compatible with pure water** —
 no special water or additives required.

✦ **Weighs only 1.1kg** —
 light and easy to carry out.

H2-HA100

■ Ocean blue ■ Rose Gold

Hydrogen Production	PEM (Proton Exchange Membrane)
Hydrogen Flow Rate	100cc/min±10%
Oxygen Flow Rate	50cc/min±10%
Hydrogen Delivery Device	Nasal Cannula
Operating Temperature	5~37°C
Water tank capacity	150cc

Operation	Buttons
Voltage	110V~240V 50/60Hz
Dimension	W87 x L157 x H170mm
Power	48W(+5%/-10%)
Weight	1.1kg

• Water Source:

Ultra-pure Water, Distilled Water or Pure Water having TDS level less than 10ppm.

• Safety devices:

Machine topple over with power-off system1 water level detection system, water quality detection system, voltage detection system.
